

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC ASIA PACIFIC EX JAPAN SCREENED EQUITY UCITS ETF

Legal Entity Identifier: 213800OOTJ3VDM7F9R44

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: <u> </u>%</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: <u> </u>%</p>	<p><input checked="" type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 30.66% of sustainable investments</p> <p style="margin-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the FTSE Asia Pacific ex Japan ESG Low Carbon Select Index (the "Index"), the Fund met the environmental and/or social characteristics through the following measures:

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE Asia Pacific ex Japan Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

FTSE Russell's ESG ratings reflects a company's exposure to, and management of, ESG issues. The ratings are comprised of an overall score that breaks down into underlying environmental, social and governance pillars with underlying theme exposures and scores.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund sought to achieve the promotion of the characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

● ***How did the sustainability indicators perform?***

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	169.09	307.35
ESG Score	3.91	3.38
Fossil Fuel Reserve Exposures	2,191.06	3,392.02

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE Asia Pacific ex Japan Index

● ***...and compared to previous periods?***

Sustainability Indicator	Period Ending	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	169.09	307.35
	31 December 2024	167.26	155.32
	31 December 2023	153.85	232.01
ESG Score	31 December 2025	3.91	3.38
	31 December 2024	3.79	3.55
	31 December 2023	3.50	3.39
Fossil Fuel Reserve Exposures	31 December 2025	2,191.06	3,392.02
	31 December 2024	1,416.22	2,177.53
	31 December 2023	1,571.21	2,692.63

Broad Market Index - FTSE Asia Pacific ex Japan Index

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:

- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals (“UN SDGs”); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager’s sustainable investment policy. A sustainable investment’s contribution to these objectives was determined by meeting one or more of the following criteria:

- Classification as net zero aligned, or better, by the Investment Manager’s net zero investment framework;
- Best in class environmental and / or social scores in the investment’s respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU Taxonomy objectives or other climate related activities.

Further information can be found in HSBC’s Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments in the Fund were assessed against the principle of do no significant harm (“DNSH”) to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts (“PAIs”) as further described below.

In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.

Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse

Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.

HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sustainability investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics used in the construction of the Index. As a result, the Index showed a more positive exposure to PAI metrics vs the Parent Index.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalent	31 December 2025	33,178.03	1,099,827,909.52
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	92.78	132.62

3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	169.09	307.35
4. Exposure to companies active in the fossil fuel sector	31 December 2025	11.50%	5.07%
5a. Share of non-renewable energy consumption	31 December 2025	71.43%	75.86%
5b. Share of non-renewable energy production	31 December 2025	9.34%	67.07%
6. Energy consumption intensity per high impact climate sector - GWh per million of Euros of revenue	31 December 2025	0.61	8,257.40
7. Activities negatively affecting biodiversity sensitive areas	31 December 2025	-0.05%	-0.10%
8. Emissions to water - Thousands of Metric tons per million of Euros invested	31 December 2025	0.30	11.24
9. Hazardous waste and radioactive waste ratio - Thousands of Metric tons per million of Euros invested	31 December 2025	10.29	7.24
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00%	6.06%
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	31 December 2025	4.96%	8.27%
12. Unadjusted gender pay gap	31 December 2025	17.43%	17.10%
13. Board gender diversity	31 December 2025	24.24%	23.83%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.07%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE Asia Pacific ex Japan Index

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	11.31%	Taiwan
BHP Group Ltd	Materials	5.37%	Australia
National Australia Bank Limited	Financials	4.59%	Australia
Infosys Limited	Information Technology	4.57%	India
Xiaomi Corporation Class B	Information Technology	3.92%	China
DBS Group Holdings Ltd	Financials	2.64%	Singapore
SK hynix Inc.	Information Technology	2.60%	Korea
Commonwealth Bank of Australia	Financials	2.40%	Australia
Zijin Mining Group Co., Ltd. Class H	Materials	2.02%	China
HCL Technologies Limited	Information Technology	1.75%	India
Ping An Insurance (Group) Company of China, Ltd. Class H	Financials	1.71%	China
ASE Technology Holding Co., Ltd.	Information Technology	1.57%	Taiwan
AIA Group Limited	Financials	1.54%	Hong Kong
Yum China Holdings, Inc.	Consumer Discretionary	1.54%	China
Delta Electronics, Inc.	Information Technology	1.43%	Taiwan

Cash and derivatives were excluded

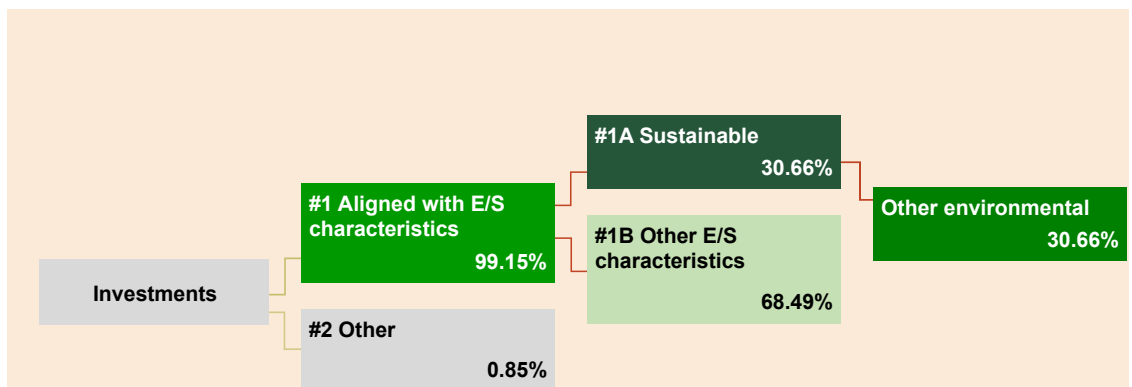

What was the proportion of sustainability-related investments?

30.66% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

● **In which economic sectors were the investments made?**

Sector / Sub-Sector	% Assets
Information Technology	36.40%
Financials	28.25%
Materials	10.45%
Consumer Discretionary	7.86%
Industrials	3.55%
Health Care	3.25%
Consumer Staples	2.98%
Energy	2.41%
<i>Integrated Oil & Gas</i>	<i>0.57%</i>
<i>Oil & Gas Drilling</i>	<i>0.03%</i>
<i>Oil & Gas Equipment & Services</i>	<i>0.06%</i>
<i>Oil & Gas Exploration & Production</i>	<i>0.27%</i>
<i>Oil & Gas Refining & Marketing</i>	<i>1.39%</i>
<i>[Unassigned]</i>	<i>0.02%</i>
Utilities	1.52%
<i>Electric Utilities</i>	<i>0.03%</i>
<i>Gas</i>	<i>1.05%</i>
<i>Independent Power Producers & Energy Traders</i>	<i>0.00%</i>
Communication Services	1.35%
Real Estate	1.10%
Cash & Derivatives	0.85%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

● **To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund did not make sustainable investments aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?**

Yes:
 In fossil gas
 In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

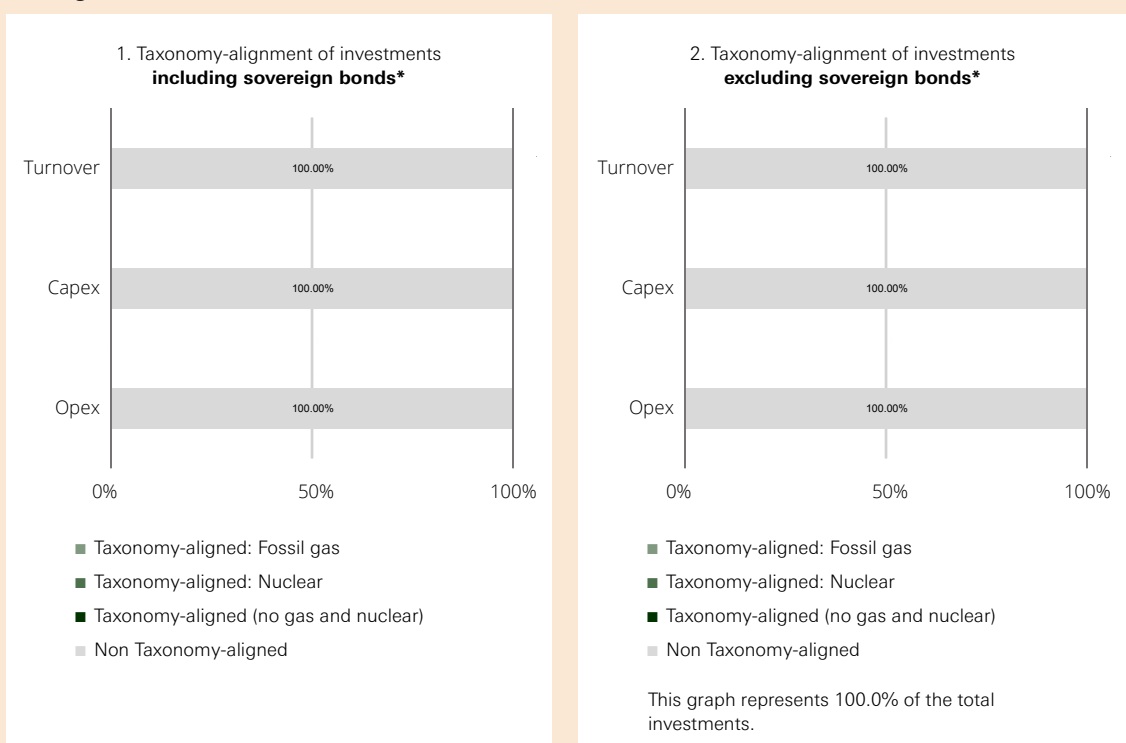

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund’s share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 30.66%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index. The Index achieved this in the following ways:

1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria;
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria; and
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns it had with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: <https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies>

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

How does the reference benchmark differ from a broad market index?

The Index is a subset of the Parent Index and aimed to measure the performance of companies in emerging and developed countries in Asia Pacific ex-Japan as defined by the Index provider.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

As further detailed above, on an annual basis, the Index provider applied sustainable exclusionary criteria and weighted companies in order to reduce the exposure in the Index to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure in the Index to comply with favourable FTSE Russell ESG ratings compared to that of the Parent Index. In addition, the UNGC exclusionary criteria were applied to the Index on a quarterly basis (i.e. on each rebalancing date).

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they are included in the Index.

In doing so, the performance of the sustainability indicators of the Fund, was similar to the performance of the sustainability indicators of the Index, as shown below.

● ***How did this financial product perform compared with the reference benchmark?***

Sustainability Indicator	Fund	Reference Benchmark
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	169.09	170.77
ESG Score	3.91	3.93
Fossil Fuel Reserve Exposures	2,191.06	2,196.22

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - FTSE Asia Pacific ex Japan ESG Low Carbon Select Index

● ***How did this financial product perform compared with the broad market index?***

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	169.09	307.35
ESG Score	3.91	3.38
Fossil Fuel Reserve Exposures	2,191.06	3,392.02

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.
