

HSBC Global Investment Funds

GLOBAL SUSTAINABLE LONG TERM EQUITY

Marketing communication | Monthly report 31 March 2025 | Share class IC

Investment objective

The Fund aims to make a positive environmental, social and governance (ESG) impact, by investing in shares and other similar securities issued by companies that actively contribute to United Nations Sustainable Development Goals (Contributing Companies and SDGs), while also aiming to provide long-term capital growth and income. The Fund qualifies under Article 9 of SFDR.

Investment strategy

The Fund is actively managed.

The Fund's investment principles, together with ESG impact analysis and fundamental qualitative company analysis are used to determine the Fund's investments and may include: continuous engagement with Contributing Companies regarding their ESG credentials and with companies regarding their ESG credentials at various stages of their ESG transition; companies following good ESG practices resulting in low and/or decreasing carbon intensity.

The SDGs that Contributing Companies contribute to include, but are not limited to: Climate Action, Affordable and Clean Energy, Clean Water and Sanitation, Good Health and Well Being and Reduced Inequalities.

Companies and/or issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies, which may change from time to time.

The Fund may invest up to: 20% in China A and China B-shares; 10% in Real Estate Investment Trusts; and up to 10% in funds.

See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

Reference benchmark	6.7	6.6	5.1	5.6

The MSCI ESG Key Issue Score is the numerical, weighted average of MSCI's E, S, and G pillar scores. A higher number indicates a more favourable ESG profile in the view of MSCI. The weighted averages of the Key Issue Scores are aggregated and companies' scores are normalized by their industries. After any overrides are factored in, each company's Final Industry-Adjusted Score corresponds to a rating. For more information, see MSCI ESG Ratings Methodology @ <https://www.msci.com/esg-and-climate-methodologies>

Risk Disclosure

- The Fund may be concentrated in a limited number of securities, economic sectors and/or countries and as a result, may be more volatile and have a greater risk of loss than more broadly diversified funds.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
